The resources required for effective professional learning include more than money and staffing. Articles in this issue show how other kinds of resources can help educators personalize learning for teachers, leaders, and students.

**TO CONSIDER**

- How can you leverage technology as a resource to personalize professional learning? How do you ensure that it is supporting your goals, rather than driving them or supplanting them?

- To what extent do you view teacher knowledge and expertise as resources for professional learning? How do you use them?

Educators have much to gain from professional learning that is tailored to their needs, as authors in this issue demonstrate. But such approaches need to be thoughtfully informed by research and best practice.

**STANDARD: RESOURCES IN ACTION**

The resources required for effective professional learning include more than money and staffing. Articles in this issue show how other kinds of resources can help educators personalize learning for teachers, leaders, and students.

**TO CONSIDER**

- How can you leverage technology as a resource to personalize professional learning? How do you ensure that it is supporting your goals, rather than driving them or supplanting them?

- To what extent do you view teacher knowledge and expertise as resources for professional learning? How do you use them?

- How can you balance personalization of professional learning with collective goals and a coherent strategy for your school, district, or state?
