Standards Assessment Inventory

Learning Forward's Standard Assessment Inventory (SAI) is a valid and reliable survey administered to school-based instructional staff that measures alignment of a school's professional learning to the Standards for Professional Learning.

The SAI measures teachers' perceptions of the professional learning they experience in their schools and systems. The tool provides important data on the quality of professional learning at both the school and system levels.

THE STANDARDS ASSESSMENT INVENTORY:

- Provides data on teachers' perceptions of the professional learning they experience in their schools.
- Reveals the degree of success or challenges systems face with professional learning practices and implementation in the system as a whole, and in individual schools.
- Provides data on the quality of professional learning as defined by the Standards for Professional Learning, a system's alignment of professional learning to the standards, and the relationship of the standards to improvements in educator effectiveness and student achievement.
- Elicits extensive collegial conversations among teachers and administrators about the qualities of professional learning that produce results for students.
- Connects Standards for Professional Learning (vision) with educator Action Guides, Innovation Configuration Maps, and other planning and implementation tools.
- Helps schools focus on particular actions that contribute to higher-quality professional learning as guided by the questions on the inventory.
